

Upgrade from 1.2 to 1.2.1

Upgrade from 1.1.4 or 1.2

You can upgrade from Razuna 1.1.4 or 1.2 directly to Razuna 1.2.1!

Overview

Razuna 1.2.1 is a bug fix release. You can always lookup the release notes and upcoming features of Razuna at the public Issue Tracker at <http://issues.razuna.com>.

Update Procedure

You should always make a backup of Razuna and especially of your database before attempting any update! That said, this process of updating Razuna is quite simple.

- Download and unarchive the latest release.
- Stop the Razuna (or J2EE) server.
- Copy the folders "admin" and "global" of the **new version** and drop them into your existing Razuna installation folder.
- Start the Razuna (or J2EE) server.
